

# nexo2 Monitor

NEW

**Nexo2:** a 7" colour TFT monitor, hands-free audio and a simple interface make for a tool that is easy to use

All functions (audio ON/OFF, door opening, accessory functions) can be activated from four simple modules.

**Call Me**

Nexo2 allows to forward a video doorphone call on smartphones and tablets through the CallMe App, adding the device complying to video doorphone system in use (see page 28).

The image shows a smartphone displaying the CallMe app interface. The screen is divided into two sections. The top section has two buttons: 'Mute' (blue with a microphone icon) and 'Open gate' (green with a door icon). The bottom section shows a video feed of a man in a blue shirt and cap. Below the video feed are two buttons: 'Terminate' (red with a phone icon) and 'Open Door' (green with a door icon). An arrow points from the 'Call Me' app icon to the smartphone screen.

COMPATIBLE WITH
